Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16, 17, 19, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tuckey et al (US 4,394,852) in view of Fitch (US 4,457,271). Tuckey et al discloses the claimed invention except for automatic operation. Crankcase pressure pulses to the carburetor are controlled by the valve device in FIG. 2 so as to supply priming fuel to the engine. Fitch teaches that it is known to operate a priming valve automatically (abstract). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the priming system of Tuckey et al so as to operate automatically, as taught by Fitch, since it has been held that broadly providing an automatic or mechanical means to replace a manual activity which accomplished the same result is not sufficient to distinguish over the prior art. See *In re Venner*, 262 F.2d 91, 95, 120 USPQ 193, 194 (CCPA 1958)

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tuckey et al (US 4,394,852) in view of Fitch (US 4,457,271) as applied to claims 16, 17, 19, 21 and 22 above, and further in view of Stenz et al (US 6,152,431). Stenz et al teaches that it is known to apply pressure above fuel in a fuel bowl (column 5, lines 2-7). It would have been obvious to one having ordinary skill in the art at the time the invention was made to further modify the

Art Unit: 3747

priming system of Tuckey et al so as to apply pressure above fuel in a fuel bowl, as taught by Stenz et al, in order to provide a carburetor structure suitable for priming.

Allowable Subject Matter

Claims 1-15 and 23-28 are allowed.

Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments have been considered but are moot with respect to claims 16-19, 21 and 22 in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3747

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
